PROFILE

As a skilled Front End Web Developer, I have a strong foundation in HTML, CSS, and JavaScript with extensive knowledge of the latest technology trends. I am committed to producing visually appealing website designs with a focus on the technical and creative aspects of front-end web development. I possess strong problem-solving and analytical skills and am adept at collaborating with cross-functional teams. With a passion for continuous learning and growth, I am an aspiring React Developer, having completed various projects demonstrating my proficiency in React, including responsive designs and user authentication.

PROJECTS

Personal Portfolio Website

<https://krishnapaudel.netlify.app>

03/2022-04/2022

- Built components using React and Tailwind
- Implemented animations using Keyframes and GSAP
- Created responsive design and dark mode
- Researched and implemented correct coding practices for SEO, resulting in an average of 95% search engine rankings

Stripe Landing Page Clone

<https://stripe-cloneapp.vercel.app/>

06/2022-08/2022

- Created using HTML, CSS, and React
- Implemented custom-made animations using CSS keyframes and transitions
- Utilized grid layout and component positioning
- Demonstrated component reusability

Face Recognition App

<https://github.com/Krisna07/Faceappassignment>

05/2022-07/2022

- Implemented image processing to get the coordinates of face
- Developed web app using MERN stack
- Implemented CRUD operations
- Conducted face recognition using face.js

CONCLUSION

As an aspiring React Developer with a diverse set of skills and experience, I am dedicated to expanding my knowledge and abilities to deliver high-quality web applications that exceed client expectations. I am highly motivated, collaborative, and committed to continuous growth and development in my coding career.
